

**SECOND QUARTER NEWSLETTER 2024**

Dear Supporters, Partners, and Friends of Entojutu,

It is with great pleasure that we welcome you to the first quarter newsletter of 2024. We are delighted to have you join us on this impactful and innovative journey. As you delve into the updates from the fields from Entojutu Nigeria, we hope that your spirits will be uplifted. Your unwavering support and partnership in empowering rural communities in Africa are deeply appreciated.

We are excited to present the latest developments from Entojutu because we recognize your support and how it has made our success in this quarter possible. This newsletter contains a summary of all our activities for the second quarter of the year and its available to download on our [website](#).

## **Beneficiary update from Ewaldi Community School in Nakaseke District, Uganda**

Our beneficiaries are demonstrating remarkable progress that fills us with pride. We are excited to announce the launch of an innovative project at Ewaldi Community School, located north of Kampala, Uganda, that has been in motion since the beginning of October 2023. This transformative initiative is centered on the establishment of a Black Soldier Fly (BSF) waste treatment center right on the school grounds.

Our goal with this project is to introduce students to the principles of a circular economy, empowering them with hands-on experience in sustainable agricultural practices. By utilizing nature-based solutions, we aim to equip the children with practical skills that will benefit both their education and their community.

The Black Soldier Fly waste treatment center is more than just a sustainability initiative—it's a learning tool and an opportunity for empowerment. Within a few short months, the students themselves will take charge of operating the center, instilling a sense of responsibility and ownership. Through this process, they will produce high-quality animal feed and fertilizer for the school farm, creating a self-sustaining loop of waste management and agricultural productivity. Beyond its environmental impact, this project also has far-reaching economic benefits. The production of animal feed and fertilizer will generate income for the school, paving the way for long-term financial independence and resilience. This initiative highlights how sustainable practices can create real opportunities for growth and prosperity.

As we witness the ongoing progress at Ewaldi Community School, we are reminded of the transformative power of education and experiential learning. Together, we are shaping a brighter, more sustainable future for these students and their community. Stay tuned as we continue to build a foundation for sustainability and empowerment through this exciting project.

## Entojutu's Large-Scale Waste Management for Sustainable Agriculture

At Entojutu, our commitment to environmental sustainability is demonstrated through our large-scale waste management efforts. Each week, we collect over a tonne of organic waste from local markets, playing a crucial role in ensuring environmental cleanliness while also supporting our agricultural operations. This initiative not only contributes to local sanitation but also helps improve weather conditions by reducing waste-related environmental hazards.

This significant amount of waste is repurposed as part of our sustainable farming practices. Once collected, the organic waste is processed and used to feed Black Soldier Fly (BSF) larvae, which in turn produce nutrient-rich frass—a natural fertilizer that enhances crop growth. By transforming waste into a valuable resource, we're not only reducing the burden of waste on the environment but also advancing our mission of promoting circular, eco-friendly agricultural solutions.

The collection and conversion of over a tonne of organic waste weekly underscores our role as a leader in sustainable agriculture. It reflects our dedication to creating a system where waste is minimized and repurposed, contributing to food security and environmental protection. This initiative is key to our broader strategy of promoting long-term sustainability while supporting the health and well-being of our communities.

As we continue to scale our efforts, Entojutu remains committed to transforming waste into opportunity, driving forward sustainable solutions that will benefit both agriculture and the environment for years to come.

**Dear friends and supporters,**

We believe that real change can only happen through a concerted effort. Like the African proverb 'it takes a village to raise a child'. We believe only through collaboration between partners can we build prosperous, climate resilient and environmentally friendly farming communities in Nigeria for a sustainable future.

We would like to express our sincere gratitude for any support that helps us to continue our work.

If you enjoyed reading this newsletter, please share this newsletter among your network of friends and associates.

Warm regards,

Adegbite Tobi and the entire Entojutu Team.
